Subject: Support HB 7009.

As a proud driver of a plug-in Prius (which I charge from the electricity produced through the solar panels on my roof) I strongly support HB7009. Wish I could be there but I am preparing and serving at a Food Kitchen in Bridgeport that day.

I would also like to see income tax rebates for people buying used EVs. Mine is a lease, and when I buy it 3 years from now, I understand there will be no tax deduction for me.
